AGRICULTURAL SHORT COURSE

WILL BE HELD AT

Stony Plain, March 19,

AT 2 P.M.

Subjects for Discussion:

"POULTRY"—G. M. Cormie, Poultry Commissioner.

"PRODUCTION AND MARKETING OF BACON HOGS"—S. G. Carlyle, Livestock Commissioner, and a Representative from the University.

All Interested Are Invited to Attend.

Alberta Department of Agriculture.

Hon. F. S. GRISDALE,
Minister.

H. A. CRAIG,
Deputy Minister

THE SANITARY MEAT MARKET.

Beef, Pork, Veal and Lamb. Fish & Poultry of all kinds. Corned Beef, Pickled Pork, Pickled Tongue, all kinds. Bacon, Hams and Cottage Rolls.

Bologna Sausages of all kinds. Wieners and Lord. Cheese, Creamery and Dairy Butter. Dill Pickles. Red Ribbon Tankages. Laymore Bone Meal. Casing of all kinds. The Best for Less.

H. B. BJORK, PROPRIETOR.

THE STONY PLAIN BAKERY.

WHITE, RYE AND BROWN BREAD, FRESH EVERY DAY, 4 LOAVES 25c
PASTRY OF ALL KINDS.

PHILIP TRAPP, Proprietor.

Agent for Swift's Canadian Creamery.

SPORTING NOTES OF LOCAL DOINGS.

The S.P.H.'s had no difficulty in disposing of the Rivordale hockey team in their game here Sunday afternoon. The 8 goals the locals got were pretty easy, and Goalie Foerster kept all the visitors' shots out of his nets—all but one. Ph Enders refereed. The Hi's are planning a trip to the City this week.

The Senior hockeyists just missed a nice trip over the week-end. Their managers had arranged a return game with Rochford for Saturday and a game with Mayerthorpe on Sunday. What stopped the works was the fact that the two outside teams didn't kick thru with the requisite guarantee of \$15.

The local Ski club, whose recent operations have enlivened very much the local sporting doings, are now planning another very active campaign, this one to take the form of a series of whist drives—the first of which will take place the coming week.

The Parliamentary Show.

(By J. S. Cowper.)

Now we know the worst—or do we?

Last Friday, Hon J. Russell Love brought down his budget as provincial treasurer. He estimates an income for the ensuing fiscal year of \$15,331,744.25, with expenditures of \$15,302,000.04.

If it wasn't for \$720,253.57 required in addition for sinking fund requirements on provincial debts, it would be a balanced budget. Alas; despite an increase in gasoline tax from 6c to 7c a gallon, it will still be \$690,479 short of requirements. That means the province will have to borrow this amount in order to keep on paying interest on its present borrowings.

Old age pensions call for \$68,000 increase; school grants \$60,000 increase.

An item of \$150,000 for election expenses denotes a coming election—probably in mid-June.

The province has settled for \$28,000 the judgment which Mr Powlett obtained for mental injuries to his son in a "bazing" ordeal as part of his higher University education.

Short Course in Agriculture.

A decided interest is already being manifested in the coming Agricultural Short Course to be held here on Tuesday next, March 19. In addition to those already billed to speak, Messrs G M Cormie the Poultry Commissioner, and Livestock Commissioner Carlyle, there will be several representatives from the University of Alberta, who will give pointers to farmers on the subjects on which they are posted. At a recent Agricultural Short Course held at Calgary farmers and ranchers to the number of about 40 were present. The session on Tuesday starts at 2 p.m.

HARDWICK'S

THE HOUSE OF QUALITY.

Women's Fine Lawn Handkerchiefs.

Good quality, with hem-stitched edges; a nice size. Special clearing, 6 for 25c.

All leaders in their class

Man's Priceless Possessions

To keep one's head in times of emergency and crisis, remain cool, refrain from excess emotionalism, hysteria and panic, is a sign of strength, and men and women who display these characteristics prove to be the real leaders of their fellow citizens. That leadership may be demonstrated without uttering a word or doing anything spectacular, but merely by being unafraid, natural and unconcerned.

This truth was impressed upon us the other day by an incident reported in the daily press in connection with a fire which broke out on a railway car between Moose Jaw and Regina. There was a rush of frightened passengers to the rear door. One man urged calmness and an orderly exit, but little heed was paid to him. But another passenger remained quietly in his seat, looking with unconcern out of the car window. His attitude impressed others with the fact that there was little danger and no need for undue alarm. People quieted down and a near panic was averted.

The world is passing through the stress and emergency of an unprecedented economic depression. It is a time to try the calibre of men and nations. Under prevailing conditions the striking of a small spark might easily cause an explosion, and a small flame spread into a great conflagration. There are individuals in all countries striving to take advantage of the present situation to stir up trouble. They are playing on the emotions of their fellow citizens, emotions which have been stirred to the depths by the personal problems, difficulties, sufferings and loss with which they have been and still are confronted. Times are ripe for the demagogue and the stirrer up of strife to ply their trade, recklessness of what the final outcome might be.

In some countries peoples have so lost confidence in themselves and so given way to panic and become the victims of emotionalism, that they have sacrificed personal rights and liberties almost over night which had taken generations of struggle by their forefathers to achieve for them. Thoughtlessly, in a spirit of panic they surrendered some of the great fundamentals of life and living because they allowed others to unduly sway their emotions and neglected to keep cool and think for themselves rather than allow others to think and act for them.

Because this is so, the hands of the clock of progress have been turned back in such countries, and their future is dark and discouraging compared with those other nations where the people, and their leaders, have kept their feet firmly planted on the ground and their heads cool and minds clear.

To-day in Canada and throughout the British Empire all people still enjoy that great safeguard of their liberties which is represented by a free and uncontrolled press and the utmost freedom in expression. Every man and woman, no matter what his or her station in life, is absolutely free to express opinions, publicly or privately, in relation to any and all matters of public policy. They are just as free to criticize and condemn as they are to applaud and praise. If they are dissatisfied and opposed to those presently in positions of authority, they are free to express their dissatisfaction and to organize to give force to their opposition.

No government agent sits in any newspaper office in Canada, no file of censorship orders lies on any editor's desk which must be obeyed. The radio, the pulpit, the public platform, is as free to opponents of present governmental policies as they are to supporters of those policies. This is not so in many of the countries of the world. Hundreds of millions of people are now denied free expression of their views, opposition to the powers that be is prohibited, even the news of the day is censored, suppressed altogether, or colored to suit the views and policies of the prevailing dictator.

The essential fact for all Canadians to ever keep in mind is that, even if a so-called economic security could be obtained by them through these autocratic methods, the price to be paid is altogether too great. A slave may enjoy security provided by his master, but the fact remains he is a slave and nothing more, and what Canadian citizen desires to become a slave?

What the whole world is in danger of losing, unless the very people who have most to lose keep their heads, are the very fundamentals of civilization, namely, the liberties of the individual citizen. Once those personal liberties are lost, and might rather than right occupies the place of power and authority, it will be the great masses of the people, deprived of their democratic institutions and liberties, who will be the sufferers. Only the struggle to regain these priceless liberties will have to be re-commenced, because man was born to be free. The battle to restore civilization, liberty and equality will again have to be waged.

Liberty, freedom, personal rights are priceless possessions. They should never be surrendered for anything else, no matter how attractively that something else may be dressed up and presented. Nothing else, nor anything else, can repay man for the loss of freedom of expression and liberty of action.

New War On Grasshoppers

Menace Serious As Last Year
Alberta Farmers Told

Just as relentless a war against grasshoppers will have to be waged this summer and fall as last year by Alberta farmers of tremendous financial loss will result, Lieut-Col. E. H. Strickland, professor of entomology at the University of Alberta, who was a visitor in Calgary, stated.

It is known that millions of grasshoppers will be massed ready for action as soon as their feeding season begins, but the counter offensive is more highly organized than ever before, due to ad experience in the past, resulting in a greater appreciation by farmers of the seriousness of the menace.

Col. Strickland stated that the present outlook in regard to the grasshopper menace was as serious as it was this time last year. In 1934, he said, very considerable damage was done by the insects, but the damage was inconsiderable when compared with the grasshopper plague between 1919 and 1922, when crops on farms everywhere in the province were wiped out.

Efforts are still being carried on to discover new methods to fight grasshoppers, according to Col. Strickland, but, so far, the most practical and efficient method has been the systematic scattering of poison bait.

A BARBER WHO HAD RHEUMATISM

Tells How He Carried On

A barber who had been "a martyr to rheumatism" for some time

I have been a martyr to rheumatism for some ten years. For five years I was so affected that it was with the greatest difficulty I was able to carry on my business. I may say I am a barber by trade. After having tried numerous remedies, I was finally advised to try Kruschen. I am pleased to say that after having used Kruschen for some twelve months, I am now free from aches and pains that I have been for some ten years. In fact, I consider I am rid of rheumatism, thanks to Kruschen Salts. —W. M.

Two of the ingredients of Kruschen Salts are the most effective solvents of uric acid known to medical science. They enter the joints and dissolve the painful crystals, then convert them into a harmless solution. Other ingredients of these Salts have a stimulating effect upon the kidneys, and assist them to expel the dissolved uric needles through the natural channels.

Sir James H. Jeans, British astronomer, calculates that the sun is dimming at approximately 250,000,000 tons a minute.

WOMAN'S AILMENTS

Dr. Mary C. Kirby of 148 Main St., St. John's, Ont., says: "I was in a suffering condition for some time, but at night, felt much better. I was told that I should use Dr. Kirby's Female Prescriptions to give me strength to carry on with my duties."

Day Of Thanksgiving

Special Services Requested In All Canadian Churches

The Canada Gazette carried a proclamation requesting special Thanksgiving services in all Canadian churches May 5 and setting aside May 6, the 25th anniversary of King George's accession, as a day of general thanksgiving and rejoicing on the occasion of our silver jubilee.

The thanksgiving services on the Sunday before jubilee day were described as giving an opportunity for "appropriate expression of gratitude to Almighty God for the manifold bounties and great mercies which our loving subjects, the people of Canada, have enjoyed during our reign."

Canadian cattle to the number of 15,392 head, in 27 shipments, were exported last week to Glasgow during the year 1934, as compared with 11,238 in 1933 and 4,016 in 1932. The quality was also greatly improved.

The more people become civilized, the more they increase their capacity for suffering. 2089.

SUNDAY SCHOOL LESSON

MARCH 17

PETER DELIVERED FROM PRISON

Golden text: Prayer was made earnestly of the church unto God for him. Acts 12:5-10.

Lesson: Acts 12:1-19.
Devotional reading: Psalm 34:1-8.

Explanations And Comments

James Killed; Peter Imprisoned, verses 1-4. Herod Agrippa I., grandson of Herod the Great, was now king, and he began at this time to persecute the leaders of the church at Jerusalem. He had James, the brother of John, executed, and this deed pleased the Jews. It was "the days of unleavened bread," as the Passover was called, because no leaven, or yeast, was allowed in Jewish homes while the festival lasted.

It was a time when the Jews were especially hostile to those who differed from them, and Herod, as Josephus says of him, "rejoiced in living in good reputation." He sought to still further enhance his reputation by having Peter imprisoned to await his execution at the close of the Passover. Executions were not carried out during the Passover, as the festival must not be polluted by the shedding of blood, and Herod was nominally a Jew (his grandmother, Mariamne, was a Jewess) and most scrupulous as to all Jewish observances.

Peter Delivered From Prison, verses 5-11. First of all in the record of Peter's escape, we are told that the church was earnestly praying for Peter. Peter was kept in prison, but earnest prayer was made for him. Notice the force of that little word "but." It was the night before his trial and execution as planned by Herod that help came.

Peter was not troubled. He was calmly sleeping. The circumstances of his escape are minutely told, the coming of the angel (God's messenger), the light in the cell, the awakening of Peter, the brief words of prayer, the falling off of the chains, the ringing and the putting on the sandals and outer cloak, the command to follow, the passing of the first and the second guard, the opening of the iron outer gate of the prison leading into the city, the going out and passing through the street, and then the being left alone.

All this time Peter was dazed and did not know whether he were waking or dreaming, until he "came to himself" at the opening of the iron gate. Then he said, "Now I know of a truth, that the Lord hath sent his angel and delivered me out of the hand of Herod, and from all expectation of the people of the Jews."

If the pot in which candy is boiled is buttered for an inch or two down the sides the liquid will not boil over.

Little Journeys In Science

PROTEINS

(By Gordon H. Guest, M.A.)

Proteins are very complex substances which always contain the element nitrogen. Protoplasm cannot be formed without proteins, and thus we see that life itself is dependent upon them. The word protein comes from a Greek word meaning "to take the first place," because the importance of this group of substance was early recognized.

Proteins occur in all living matter and are present in all natural food stuffs. Due to the fact that they are the chief constituents of living animal tissue, they are most plentiful in animal foods, such as meat, eggs and fish.

Scientists have found proteins to be the most complicated substances ever studied. They have found that proteins contain carbon, hydrogen, nitrogen, oxygen and sulphur, while some also contain phosphorus. Small quantities of other elements are found in certain proteins.

Proteins are used by the body for building tissue, and also for producing energy. For providing the material for growth in children, and for repairing waste tissue in adults, they are more valuable for these purposes than the proteins in vegetables.

Milk is a valuable source of protein and is especially good for children. Science has shown that there are thousands of different kinds of proteins varying in structure and quality. During the process of digestion, the proteins are decomposed into simpler substances, known as amino acids. These are absorbed and recombined in new proportions, forming other proteins which have different properties than those which were taken into the stomach. Thus the proteins in food are different than those actually used by the body.

Increased Grants To Be Made To Fairs And Exhibitions By The Dominion Government

Increased grants to fairs and exhibitions from the Dominion government were announced by Minister of Agriculture Robert Wair. Class "A" summer and winter fairs may now earn as much as \$3,000 from the government. Class "B" will be able to receive \$2,000 in Quebec and \$3,000 elsewhere.

A statement by the minister gives these reasons for higher grants:

1. Adequately to increase and extend prize lists necessarily limited during the past few years on account of reduced grants.

2. To allow better provision by fair boards to obtain necessary judges of required caliber.

3. To assist in developing what is considered one of the most important phases of exhibition work—boys' and girls' work and junior activities.

In Canada are 19 class "A" summer fairs, 12 winter fairs, and 28 class "B" fairs, the department of agriculture revealed.

Maximum grants to class "A" or summer fairs will be increased from \$2,500, as applied during the past three years, to \$4,000. To earn the maximum grant of \$4,000, the maximum expenditure of \$8,000 in prize money in agricultural classes will be required. In addition each fair will be eligible for a further grant up to \$500 to be applied specifically to the support of boys' and girls' club work and junior activities generally. The benefit of this support will be reached by each agricultural society or board in consultation with a representative of the Dominion department of agriculture and a representative of the provincial department of agriculture and service responsible for the administration of club work in the province. A further grant of \$500 will be made towards the cost of providing judges. Total grant which may be earned is \$4,500.

Maximum grants to winter fairs will be increased from \$3,000, as applied during the past three years, to \$4,000, with a further sum available up to \$500 for the development of junior activities, plus a grant of \$500 to apply to the cost of providing judges.

To earn the maximum grant of \$4,000 a minimum expenditure of \$8,000 in prize money on agricultural classes will be required. Total grant which may be earned is \$4,500.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT
(Grapho-Analyst)
(All Rights Reserved)

(Editor's Note: Marked interest is being shown in these articles, and letters are coming in to increasing numbers. Have you had your handwriting analyzed? Have you any problem in which this well-known writer could help you? See his invitation following this week's interesting article.)

A surprisingly large number of readers have written from time to time, asking for advice regarding friends with whom they have become acquainted through the medium of correspondence clubs. Sometimes the object is merely to have interesting correspondence, and there is really no particular harm in this.

The real danger arises when the object is more intimate; when, in fact, the aim is marriage. The case in the United States in which a man became acquainted with a number of ladies through a correspondence club, and murdered them for their money must be still fresh in the memory of many readers. However, it is not every case that reaches this horrible pitch, by any means.

Very frequently, however, women become embroiled with men and marry them, only to find that their impressions of the man were anything but correct, and they have lived to rue their decision.

This article is especially aroused by a letter I have just received from a lady reader in the East. She asks me about a man, living in the West, and writes to know what I think of him. She is a widow, 38 years of age, with two pretty children, and very comfortably off financially. The man, on the other hand, says he is 49, is still married but is separated from his wife, he

cause, she says, she made his life miserable, and was interested in other men.

He is very anxious to marry the widow, and will, he says, obtain a divorce. Now I have seen letters that he has written. And they reveal not only that he is selfish and self-centred, but also has a violent temper. I cannot imagine anyone living with him having any happiness, because his temper is such that he will break out into a frequent fury. And there is very little that could be worse than this.

This man is avaricious. He knows that this widow has money, and he would like nothing better than to get possession of some of it. And there is still another angle. He is avaricious. Certainly he is not the type of man for my correspondent. They became acquainted through a correspondence club. And it shows up one of the very real dangers that lurk in these clubs. Here is a married man, who first posed as a single man, until he thought he could appeal for sympathy to this widow.

It is not going to lay it down as an axiom for my readers that they should have nothing to do with correspondence clubs. That would be injuring the innocent as well as the guilty. For there are many people, living in remote parts of the country, and in many cases too retiring to make friends in their own locality, who seek some similar bond elsewhere in the country, and conduct a correspondence that brings them reassurance into both lives. At times, happy marriages result from these mail acquaintanceships. But grave care must be taken by would-be correspondents. The dangers should be borne in mind.

And it is especially to single girls that I address this word of warning. Women who have been married and become widows, are, very often, better vented in their trials, and have at least that much advantage.

In the case I have mentioned above, my advice to the widow is to have nothing to do with her married correspondent. I do not trust him, and believe that he will bring nothing but unhappiness to my correspondent if any marriage is to be the result.

One other word in regard to these correspondence acquaintanceships. Beware of any man who appeals for money. It may seem surprising that such a warning is necessary. And yet I have known of women who have sent money, following the interchange of letters through one of these clubs, and have lost it.

The author will analyse your handwriting for you, and he will tell you what your friends are really like, without any trills. Send specimens of the writing you wish to be analyzed, stated birthdate in each case, and enclose 10c coin for each specimen. Send with a 3c stamped, addressed envelope, to Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. All letters are confidential. Replies will be forwarded as quickly as possible, but some delay is unavoidable, owing to the large number of letters that are coming in.

Punishment Not Adequate

Light Fines Are Not Deterrent To Reckless Drivers

So long as reckless drivers escape adequate punishment when they appear before the courts, so long will campaigns of education on careful driving and public safety crusades fail to have any effect. Infractions of traffic rules in ninety-nine cases out of every hundred are punished with light fines which seem to have no deterrent influence on bad driving. Loss of the right to drive for extended periods is the only effective cure for reckless driving, but it is not applied with necessary frequency and severity. The impounding of vehicles concerned in reckless driving cases for extended periods should also be included.—Calgary Herald.

Working On Airport

The defence department has spent \$43,000 on the Hope airport in British Columbia. Defence Minister Grotte Stirling told Hon. Ian MacKenzie (Lib., Vancouver Centre) in the House of Commons. The airport covers 20 acres of land, of which 20 have already been cleared. A total of 65 men are engaged on the work.

Neither harmful nor useful, the blue nightshade is related to the potato and many deadly poisonous plants.

May Mean New Industry

Canada Greatly Interested In New Process For Flax

Ontario textile manufacturers are showing a keen interest in the Franklin E. Smith flax process which its promoters in Lancashire, England, claim will make linen cheaper than cotton. A. W. Hyndman, manager of the Royal Bank of Canada at Charlottetown, states.

He was in receipt of a letter from T. A. Gordon of the firm of Gordon and Son, Barrie, Ont., who stated in Barrie six flax mills were operated during the Great War and for some time afterwards but the business, owing to the Russian trade with Belfast, was "practically ruined."

"We would be pleased," Mr. Gordon wrote, "to grow flax and scotch it here for the Lancashire markets. It might be possible to have a permanent trade established."

Franklin Smith, the inventor of the new process, is a native of Charlottetown and is now a British government consultant. The Prince Edward Island Department of Agriculture is watching the Lancashire experiments with interest, seeking in the perfection of the process the possibility of a new industry for the province—the growing of flax—which was a well-established handicraft industry there at the time the Charlottetown inventor left his native province.

After "successful experiments" in the mixing of waste flax fibre and cotton for use in the production of special mechanical and chemical processes into a new type of fabric, investigations are being carried out with the co-operation of the Canadian government's experimental farm near Ottawa into the possibility of utilizing flax straw, a waste product from farms, to supply the raw material for the new type of fabric.

France plans to take off the market its large surplus of wheat.

The SNAPSHOT GUILD

Pictures Should Tell Stories

It's the story-telling picture that creates real interest. Avoid stiff poses such as the picture to the right.

Is there any form of amusement older than story telling? From the cradle to the grave we hear stories—and like them. Before we were able to toddle, we were hearing about "This little pig went to market, etc.," while mother gently pulled each toe as a matter of illustrating her story.

Hundreds of thousands of juvenile story books are sold every year and the ones we love most in our young years were those translated into pictures, because they had a human appeal. All through our lives we retain our interest in pictures stories. It is this appeal that takes us to the movies and causes us to look through the pages of daily newspapers and magazines for pictures that tell stories of human activities.

But when it comes to snapshots, so many seem to forget how telling they enjoy looking at story-telling pictures. They pick up their cameras and just shoot, seemingly satisfied to get just any picture at all, as it was in the old days of "You Press The Button And We Do The Rest." There is a better way to take pictures.

If you want some good laughs look over some of the pictures you have taken. Unless you are an exception, and let's hope you are, you will probably find a picture of Uncle Louis standing as straight as a plumb-line, back up against a tree or the garage door, and appearing to be facing the firing squad ready to be shot at. If Uncle Louis can't do anything else, the chances are he can read a newspaper, so why not have him do that? You will have a picture that tells some sort of a story at least, and is seasoned with that human interest factor that should be in every film you expose. You go out on a picnic with your

International Committee Doing Great Work In Endeavor To Rid Country Of Crop Pests

Initiative Suicide

Reducing This Fully Through Co-Operation Of The Press

Through co-operation of the press, says Lieut.-Col. James Ware, coroner of York, Eng., he has been able to reduce a certain type of suicide in one West Riding town by nearly 100 per cent. His suggestion that full details in these cases be not reported was adopted. He believes lack of publicity would virtually eliminate the "initiative suicide."

Lieut.-Col. Ware has made a careful study of religious beliefs held by those who take their lives. In a long experience he has had to hold a suicide inquest on only one Jew and only two Roman Catholics. In both these religions, he says, self-destruction is regarded as one of the most heinous sins.

He is unable to accept the common assertion that a person who commits suicide is insane. "In my experience at least, 50 per cent. are perfectly sane when they do it, and they intend to do it for the purpose of avoiding their responsibilities in this life. I base that upon my own experience and on what I have read by reliable people who have studied the subject."

Thomas Wedders, an 18th century Englishman, had the longest nose of history. It measured 7½ inches, and Wedders made his living exhibiting it.

The first universities in the New World were founded simultaneously in Lima, Peru, and in Mexico City, 1563.

Quite apart from the great work accomplished individually and co-operatively by entomologists of the governments of the United States and Canada, the recent meeting of the American Association of Economic Entomologists served as an important object lesson in international co-operation. Leading scientists were there, representative of the North American continent—Canada, United States and Mexico. In his address to the meeting Mr. Arthur Gibson, Dominion Entomologist, Department of Agriculture, Ottawa, dealt with the history of the admirable co-operation which exists between the United States and Canada.

For the past fifty years, he said, the entomological departments of the two governments had been drawn closer and closer and had developed a co-operation the equal of which does not exist between any two other nations. The entomologists of the two countries work out their problems together, as in the typical example of the organization known as the International Great Plains Crop Pest Committee.

Originally this committee was named the Northwest International Committee on Farm Pests and came into being in Winnipeg in 1920. Since that year workers from both sides of the International line have met in annual conferences, the meeting places of these meetings the benefit to the United States and to Canada has been mutual. The work on the Canadian prairies has been advanced considerably, and from all reports the discussions and exchange of experience have been of equal value to the United States officials.

Canadian Flying Club

Six Per Cent. Increase Shown In Flying Time Activities

A six per cent. increase in the flying time activities of the 22 clubs of the association was reported at Montreal to the opening session of the annual meeting of the Canadian Flying Clubs' Association by George M. Ross, Ottawa, executive secretary.

In his annual report, Mr. Ross stated in 1934 a total of 10,581 hours were reported against 9,971 in 1933. The average flying cost in 1934 was \$9.40 per hour, a reduction of 32 per cent from 1930, he said. Among those attending were: H. H. Richards, Fort William; N. H. Layton, Winnipeg; Dr. E. A. McCulloch, Regina, and Maurice Burbridge, Edmonton.

A Strange Train

Locomotive Is Double And Runs On One Rail

The designer of strange train seen in Ireland apparently set out to reverse the long accepted procedure. Instead of building a single engine to run on two rails, he made a two-one-engine to run on a single rail. The locomotive is double in all respects, having two boilers, two smokestacks, and two fireboxes, hitched together like Siamese twins. The cars as well are in two parts, and the whole train straddles the single rail. To further carry out the scheme of balance passengers traveling on the odd train are seated so that their weight is distributed equally on each side of the rail.

Island Is Horseshoe

The last horse has gone from Cape Sable Island. James H. Dexter of Clyde River, New Brunswick, recently purchased from Moses Smith of West Head the sole remaining stud, leaving not only West Head but the whole island "horseless."

Some of the big dogs, such as great danes, are old at nine years, whereas some small breeds live 18 to 25 years.

JOHN VAN GUILDER.

Are you tired, run-down, irritable?

Constipation steals your energy!

Thousands of sufferers from constipation have captured new health and vitality with Quaker Bran . . . a pleasant, natural corrective for constipation.

Gentle, safe and effective . . . It stimulates sluggish intestinal muscles . . . produces regular healthy bowel movement. Eat Quaker Natural Bran with your regular cereal or in delicious muffins and cookies.

A booklet of easy recipes is in every package.

Remember, Quaker Bran is different from all prepared bran cereals. It is pure bran, uncooked—untreated—unadulterated. For these reasons it is definitely richer in mineral and vitamin content.

QUAKER BRAN

Pure, Natural, packaged bran.

WORLD HAPPENINGS BRIEFLY TOLD

The new university library at Cambridge, costing \$2,500,000, will be officially opened by the King, Oct. 22.

An ancient monument built probably 4,000 years ago has been brought to light at Manghol, near Ramsey, Isle of Man, by archaeologists.

Another of the scientific world's "problems" dissolved with the announcement by a pair of Chicago scientists that they had perfected a method of producing liquid copper after eight years of private research.

In honor of the visit of the Canadian delegation to the fifth Imperial Press conference, an avenue of maple trees has been planted in Bloemfontein, South Africa, along the road leading to the memorial to Canadian victims of the Boer war.

Word was received from England of the selection of Dr. J. S. Foster, professor of physics at McGill University, Montreal, for election to the Royal Society of London, the highest honor that can be conferred on a British physicist.

INFANTS' COLDS

Relieved!

Young children easily catch cold. So Mrs. Susan Ward, of Hilton Beach, Ont., wisely says: "If I notice that there is any sign of a cold I give Baby's Own Tablets and find they are great. Thousands of mothers do the same not only for colds but for fretfulness, indigestion, constipation, teething troubles, colic, upset stomachs and so on. Baby's Own Tablets are safe and sure in relieving childhood's common ailments. Price 25c.

Dr. Williams' 15c
BABY'S OWN TABLETS

The fire prevention expert for the United States Department of Agriculture in a recent address stated that fire loss on farms would be substantially reduced if a ladder were part of the equipment of every farm. A ladder kept in a convenient place makes any roof fire quickly accessible and provides the means for occasional inspection of chimneys and flues.

GET RID OF THE CROWS

(By JACK MINER)

(Continued From Last Week)

Dear reader, the answer is only a flash of the cruel, wicked, murderous ways of the black nest robbers. Fortunately, in those days there were not many crows. Really, I don't believe there were ten per cent. as many of them as there are to-day. We must not blame the crows for their increase. This is man's fault. We have gone wrong. We have combined our force with the crows and pointed all our attention at the game birds. Yes, and song birds, too, and left these organized nest robbers to multiply by leaps and bounds.

Thirty years ago no crows wintered in Ontario, but now they are with us the whole year around. In travelling from Windsor to Chatham, Ontario, a distance of less than 60 miles, I firmly believe I have seen over 100,000 crows in less than an hour. There is another reason for their multiplying so rapidly the last 20 years, their worst natural enemy is practically gone, the raven. Forty years ago, ravens were just about as numerous in this country as crows. The raven is nothing but a big, powerful, overgrown crow in habits, only he doesn't migrate. He will search for a crow's nest and rob it of its eggs and young, treating them just the same as the crows treat our robins, mourning doves and dozens of other species of lovely, desirable, song and insectivorous birds. The raven is an inhabitant of the more dense woods, but will scour the clearing for food and, up until the last few years, they fairly thronged in northern Ontario and Quebec.

Between 1895 and 1905, the very height of my sporting ambition was big game. I usually carried four ordinary two bushel, twine sacks and when I shot a moose I would bag the meat up, carry it a few rods and cover it with boughs to make it suspicious-looking to the wolves. Then, I would shoulder the head and go to camp. When the party of us would return the next day to carry out the meat I have often seen as high as a hundred ravens fly up from the running gear of one moose. But now going over the same ground, I haven't seen a single raven for two or three years.

You see, the price of furs started soaring in 1904 and kept right on going up. Think of it! Mink skins that sold for \$10.00 each now sell for from 15 to 20 dollars. Fisher skins that sold for \$3.50 now bring \$100. And a great many other furs soared in proportion. The result is that in the last 15 years the woods have been overrun with trappers and although against the law, the majority of them used quantities of strychnine and just as soon as the ice will carry a man, about every lake in northern Ontario, has poison bait or baits upon the ice. Some trappers will shoot deer and moose for no other purpose than to make poison bait of it. By injecting the poison into the meat while warm, I understand, they make a most dead-

Photo shows Jack Miner holding Henry Ford's photo in his hand. Each year when Jack Miner's birthday arrives Henry Ford visits the Canadian Naturalist. Last year he was presented with an autographed photo of the Automobile Magazine.

ly kind of bait. Putting bait on the lake gives the trapper the great advantage of finding the fox, wolf, fisher, lynx, or whatever animal takes the least bite of it. You might say with so much poison in the woods why don't this reduce the number of wolves? The fact is that the wolves are very shy, and it is only the few experienced trappers that are able to get wolves to take poisoned bait.

In January, 1905, I was with a professional trapper. On going to his bait on a lake we saw that a raven had taken a few pecks of the bait, had flown about 60 yards and died. A fox had eaten part of the raven and lay stretched out within 20 feet of it. There was a fresh fall of snow and as the fox came from the direction we were going, tracked him back for fully one-half mile, and I am absolutely certain he did not get any other bait in that distance. Hence it is plain to see how the high price of furs has all but exterminated the raven. In fact, the crow's only enemy, now, are the fox, the great horned owl and red-tailed hawk, but these three combined aren't one, two, three, with the raven. I have been asked by a great many people "why didn't this poison kill all the wolves?" In reply to this, let me say, the wolf is the shrewdest animal to poison or trap on earth. So many inexperienced people, carelessly putting out this poison, caused the wolves to be shy of any cold bait they saw. In fact, it is only experienced trappers that knew what that means. The most experienced trapper gets them taking bait weeks before they put any poison in it.

Before I go further, I want it distinctly understood that apparently all left me. But how can I call myself humane and stand and see these black highway murderers of the air continually robbing the more desirable birds of their eggs and young, and hear the mother screaming and crying, "Help, Help, Help!" How can I be humane and hold myself when I know he is coming back to repeat this cold-blooded, murderous deed. Moreover, I know that if one of these insectivorous or song birds were left to mature, it would do more good in ten minutes than a dirty old crow would do in a day. Think of all the good descendants of this one insectivorous bird would do had it been allowed to mature and raise young. Oh, but you sigh and say,

SCIENTISTS FIND FASTER WAY TO RELIEVE COLDS

1. Take 2 Aspirin Tablets.

2. Drink full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 2 Aspirin Tablets in a third of a glass of water and gargle. This eases the soreness in your throat almost instantly.

"Jack Miner, are you sure that you know what you are writing about?" Yes, I am. I have tested it out. In 1910, I started reforestation near my home, in fact nearly all around my home. I secured the majority of the trees from the Ontario Forestry Department. The fifth year I had one nesting pair of mourning doves and now the doves nest and roost among these trees so thickly that they are actually breaking the limbs down. During May, June and July I can take you to at least three hundred occupied doves' nests in that time and, to-day, I would far sooner loan you my gun and permit you to go in there and shoot 100 pairs of doves than to allow one pair of crows to nest there and murder and terrorize this whole bird haven. Remember, here in southern Ontario doves nest from four to five times a year. My intimate friend, Mr. W. B. Saunders, of London, Ontario, located a dove's nest here with young doves as large as sparrows on April 15th. Fully 90 per cent. of them ceased nesting by September 1st. Why, bless your life, these doves have got so bold that last summer there were three pairs nesting at one time on the piles of drain tile at our drain tile factory adjoining this little sanctuary. And remember, there were from five to eight men working there all summer, piling out and shipping away tile. But one-half mile north of here is a ten-acre wood, equally as inviting for any desirable bird to nest in, but there are no doves there, for the simple reason that there is usually a crow's nest in that vicinity. Remember, these doves are only one variety of desir-

Ache and Discomfort Eased Almost Instantly Now

When you have a cold, remember the simple treatment pictured here . . . prescribed by doctors everywhere today as the quick, safe way.

Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly.

Just take Aspirin and drink plenty of water . . . every 2 to 4 hours the first day—less often afterward . . . If throat is sore, use the Aspirin gargle.

But be sure you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin Tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

able birds that nest in there under our protection from the crows, coppers and sharp-shinned hawks. Robins and catbirds are wise to this protected spot. Really, just isn't it lovely to think, yes, to know, that these sweet, lovable creatures are so ready and willing to come to us homely, human beings for protection? Doesn't it take us face to face with God's kind promise, "Let man have dominion over all." (To Be Continued.)

As many as 700 whales are taken in the Hudson Bay Company's annual drive for white whales.

Constructed after extensive field surveys last fall by Dominion and provincial entomological officials, this map indicates the prospective grasshopper infested areas in Western Canada, and the expected severity of the outbreak.

WORLD WHEAT PACT ADMITTED A DEAD LETTER

London.—The 1933 world wheat pact admittedly became a dead document, five months before its normal expiration date, as the "big four" wheat nations gave up attempts to secure Argentine co-operation in controlling exports for the remainder of the crop year.

Little hope has been held that anything could be done at this late date, owing to Argentina's repudiation of the pact at Budapest last November on the grounds it was unfair to her, and the refusal of the Buenos Aires government to accept new proposals last month.

Until now, however, the other delegates have maintained Argentina was bound by the tentative quotas adopted late in 1933 for the current year, under which Argentina's 1934-35 shipments were restricted to 148,000,000 bushels.

Now the other delegates admit there will be no further enforcement of any provisions of the wheat pact or its subsidiary agreements by any of the 21 signatory countries. All the big four countries—Canada, the United States, Australia and Argentina—will begin planting in the next few months without any average limitations whatsoever so far as the world pact is concerned.

Argentina is now in a deadlock with the other three exporters, each side insisting it is up to the other to make new proposals. A scheme to base future quotas on the 1934 acreage, when all four countries made acreage reductions—Argentina least and Australia the most—was rejected by the South Americans. Then they rejected a proposal for allotting quotas on the basis of each country's percentage of world trade in the preceding year.

Argentina's last written reply to the other exporters, it was revealed, argued she does not feel it incumbent upon her to make a counter-proposal, especially as the proposals she rejected were combined offers of the other three powers.

Revolt In Greece

Whole Country Paralyzed With Fear And Mingivings

Ghevghelli, Greek-Yugoslav Frontier.—Despite the announcement of the Athens government that it has the situation in hand and expects soon to crush the revolution, neutral observers in Greece considered the situation highly dangerous.

Martial law prevails throughout Greece. The whole country appears paralyzed with fear and mingivings. Rail, telephone and telegraphic communications are cut off and normal activities are suspended.

While Greece proper apparently was free from military clashes, eastern Macedonia, Epirus and the Greek islands where the followers of former Premier Eleutherios Venizelos dominate, appeared to be in a state of ferment.

Heavy fighting with serious losses on both sides was reported between government troops and rebels in the Struma valley, which during the Great War was a most bitterly contested area between the allies and the central powers.

All telegraph and telephone service has been suspended, not only within Greece but to points abroad. Cinemas and other places of amusement have been closed. All steamer services to Greek and other islands as well as to Greek ports on the mainland are suspended.

The entire plant and stocks of the Standard Oil Company at Salonika have been impounded by the government. Motor trucks, horses and other equipment belonging to foreign companies have been commandeered for war purposes.

Arrest Spy Suspects

Copenhagen.—Ten supposed United States citizens and a Danish Communist, believed to be under suspicion of authorities of attempting to establish an espionage or terrorist centre in Denmark, were arrested here.

Foster Tourist Trade

Ottawa Members Discuss Possibilities Of Development

Ottawa.—Members had a field day in the House of Commons extolling the tourist attractions of Canada as a whole and their own parts of the country in particular. In their enthusiasm they could not find time in the three-hour session to pass a vote of \$200,000 to be used to foster Canada's inter-provincial and international tourist trade.

Railway Minister R. J. Manion sponsored the \$200,000 vote, an increase of \$100,000 over last year. He listened to all sorts of suggestions on how to attract more tourists—national highways built and maintained by the Dominion, extending across the country; a campaign in the United States to convince Americans that Canadians are not ignorant or backward; cheap week-end tickets on the railways; passes on Canadian railways for American senators and congressmen so they could discover something about the country, and right down the line to courteous customs inspectors and hotel keepers.

The only opposition to the vote was when several members claimed it was too small, one suggested it be increased over the years to \$200,000. The vote will be discussed another day.

Mr. Manion said that in 1929, \$309,000,000 was estimated as the value of the country's tourist trade and in 1934, \$140,000,000. Canada should have a tourist industry worth \$500,000,000 when prosperity returned, the minister said.

Dr. Manion paid tribute to Canadian newspapers which had assisted in making Canadians tourist-conscious and aided the tourist bureaus.

Robbery Is A Mystery

Big Gold Shipment Removed From Croydon Airport

London.—Scotland Yard had another puzzling case on its hands—how and by whom three boxes containing gold worth £21,000 (£102,000 at par) were stolen from the administration building of the Croydon airport.

No keys were missing and an outside oak door to the strong room was locked, but the inner steel door was open and the boxes gone. They were difficult to handle on account of their weight, and how they were removed from the administration building and the airport itself without attracting attention of half a dozen officials constantly on duty was a mystery to the investigating detectives.

No fingerprints were found and this was taken to indicate the robbers wore gloves.

Forced To Change Route

Imperial Airways Service Disturbed By Civil War In Greece

London.—Civil war in Greece has forced Imperial Airways to alter the route of its Empire service to and from Africa, India, Singapore and Australia.

Sidestepping Greece because of that government's temporary ban on the movement of commercial planes, the British ships, through the co-operation of the Italian government, will be routed via Malta, Benghazi, Tobruk and Alexandria.

Sask. Checker Association

Ninth Annual Tournament To Be Held In Saskatoon

Saskatoon.—The ninth annual checker tournament will be held at the Empire hotel, Saskatoon, beginning on Tuesday, March 19, at 9 a.m. The annual meeting will be held Monday evening the 18th at 8 p.m. A cordial invitation is extended to all checker players in the province to come and participate in this which promises to be an unusually interesting tournament.

In the "A" class, 1st prize, the Hon. J. G. Gardiner and Wes. Champ trophy and cash \$10.00, and 2nd prize, cash \$5.00, and 3rd prize, cash \$4.00, and 4th prize, cash \$3.00. In the "B" class, 1st prize, cash and merchandise \$10.75, and 2nd to eighth prize, Veterans' class, 1st prize, the Hon. R. J. Latta trophy and cash \$4.00, and on down to 4th prize.

PROMOTED

Group-Captain Frederick Sowrey, who, as a R.F.C. pilot, in 1916, brought down the Zeppelin L.32 in flames at Billericay, Essex, has been appointed to command the R.A.F. Middle East depot at Aboukir. He previously commanded the No. 3 armament training camp at Wiesloch.

Life Insurance Figures

Insurance Written And Paid For In 1934 Reaches Huge Sum

Ottawa.—During the year 1934 the net amount of life insurance written and paid for in cash in Canada was \$596,062,000, an increase of three per cent. over the corresponding amount written in 1933.

In making this announcement, the Dominion department of insurance states these are approximate figures compiled from annual statements submitted by the companies.

In 1934 ordinary insurance amounted to \$43,998,908, industrial insurance to \$144,041,679, and group insurance to \$10,931,463. The total net business in force in Canada on Dec. 31, 1934, was \$6,220,208,626, or a decrease of 4 per cent. under the corresponding amount at the end of 1933.

Expansion Of Radio

No Definite Decision Has Been Reached At Ottawa

Ottawa.—No definite decision has been reached as to an expansion of the facilities of the Canadian Radio Commission, Hon. Alfred Durnaneau, minister of marine, told the House of Commons.

Hon. W. D. Eider (Lib., Waterloo North) said he had heard reports the commission proposed to spend \$1,000,000 on the acquisition of new stations. Mr. Durnaneau said he knew the commission had some scheme in mind but nothing definite had been decided regarding expansion.

Housing Plan

Would Revive Scheme To Construct Homes In Winnipeg

Winnipeg.—Winnipeg's civic house committee pressed for revival of the old housing scheme and expenditure of \$2,000,000 in 1935-36 on construction of homes for rental, sale or for rental with option of purchasing without reference to ratepayers.

At present the city has the right from the Manitoba legislature to go ahead with a \$1,500,000 program of rehabilitation and new construction if and when the voters give their approval. It was stated at a meeting of the committee.

The old housing scheme was in operation during 1919-23 and was administered by an independent commission of which the city treasurer was chairman. It made 712 loans totalling \$2,761,681 and arranged repayments so that borrowers made regular lump sum remittances for principal, interest and taxes.

Silver Jubilee Fund

Contributions Received From Persons Which Means Great Sacrifice

Ottawa.—The King George V. silver jubilee cancer fund management noted receipt of contributions from many persons for whom donations meant "not only hardship but actual sacrifice." It said such conditions were revealed by correspondence enclosed with subscriptions received and acknowledged by the Countess of Renbrough.

One Montreal woman wrote: "I am not complaining, but my husband has not earned one cent for three winters; but such as I have I share for a great purpose and with a good heart."

Her Excellency received from a Toronto home for the aged \$1 and a note saying it was "from two Englishwomen over 70 years old."

Prepare Voters' Lists

No Decision Has Been Reached About The Revision

Ottawa.—Secretary of State C. H. Cahan told the House of Commons that no decision had been made about the revision of the election lists which ordinarily would be started April 15.

There had been some discussion, he said, of allowing the present lists, now being printed, to stand without revision but the government had made no decision.

Questioned by Liberal leader Macleod King, the state secretary said some 4,200,000 names on the election lists had been put in type by the government printing bureau and the rest would be ready by April 1. There are about 5,800,000 names on the lists.

WHITE PAPER IS BLAMED FOR HITLER REFUSAL

London.—Preparing formally to accuse the National government of endangering the peace of Europe, the Labor opposition in the House of Commons laughed when Foreign Secretary Sir John Simon informed the house his visit to Berlin had been postponed on account of Adolf Hitler's cold.

Sir John imperturbably informed the house he was in communication with the German government as to when the talks over the far-reaching security plans envisaged in the Anglo-French communique might conveniently be held. He refused to link Berlin's postponement with the white paper on increased armaments. The government accepts Hitler's explanation.

This white paper, written by Prime Minister Stanley MacDonald, one-time pacifist, pointed to "unstable and uncontrolled" re-armament in Germany as one of the factors necessitating strengthening of the British forces.

Butter over the substantial increases in British defence estimates, completed with the naval budget, the opposition decided to move a motion of censure on the government charging the Berlin postponement is directly due to the white paper. The motion has no chance of success in face of the huge government majority, but it may provoke a stormy debate.

Sir John flatly turned down suggestions the white paper be withdrawn. Even among friends of the government the wisdom of its issuance on the eve of the Berlin meeting was sharply questioned.

The house laughed when Frederick Cocks, Laborite, asked: "Will the foreign secretary take this opportunity to visit Moscow, where they have not lost their voices?" Sir John did not reply.

Prime Minister MacDonald was confined to his room with a cold. Pending a fresh German reply, the cabinet was without official information on whether the German government intends to renew its invitation, indefinite postponement of which left the international situation very much up in the air.

Before the house opened the Labor members had a meeting at which, it is understood, Arthur Henderson, former Labor leader and now a private member of the house, rejected suggestions he resign the chairmanship of the world disarmament conference in protest against the British armament increases.

May Test Parachute Idea

Aviator Plans To Use One To Lower Aeroplanes

Sacramento, Cal.—A spectacular attempt to lower a transport aeroplane, possibly filled with passengers, to earth with a giant parachute, will be made here, May 19, by Col. Roscoe Turner, noted speed flyer. The demonstration will seek to prove the feasibility of equipping transport planes with emergency parachutes.

Several years ago Col. Turner dropped in an open biplane to earth safely in such a manner.

Union Of Militia Units

Ottawa.—Another alliance between a Canadian militia unit and a regiment of the defence forces of an overseas Dominion was announced by Defence Minister G. B. Stirling here. The Edmonton Regiment, with headquarters in the Alberta capital, has become allied with the Kimberley Regiment of South Africa.

Calgary Relief Qualifications

Calgary.—Twelve months' residence in the city will no longer constitute automatic qualification for receiving city relief here, it was announced at the close of a civic relief committee meeting. In future all cases will be judged on their merits in deciding whether they should be civic, provincial or Dominion charges.

Chile is to raise a fund to combat fruit diseases and pests.

LONDON'S SAFETY BEACONS INTRIGUE BAMBINI

The safety traffic beacons, which have been installed throughout London to aid pedestrians crossing busy thoroughfares, proved a great attraction for Babe Ruth when he arrived there recently. Here we see the "king" of baseball with his wife and daughter "aising up" one of these Belisha monsters.

Word received from the
head expert of the Pacific
Radio Engineers, P Furman,
intimates his intention of re-
turning to Stony some time
next time, or as soon as his
engagements at Jasper per-
mit.

In spite of the cold snap on
Friday last, Ed Hoffman's sale
was a very successful one, ev-
erything was sold and good
prices obtained. Mr Hoffman
leaves, when the weather moder-
ates, in his closed car, with
part of his family, while the
balance will go by train, to
their new home near Chilli-
wack.

The 1935 town council held
its first meeting on the 7th,
when one application for re-
lief was received and dealt
with.

On Sunday next, March 17,
an English Lutheran service
will be held in Stony Plain
by Pastor H Kuring, start-
ing at 8:30 p.m.

The local Social Credit com-
mittee are to be congratulated
on the splendid success which
has attended their efforts in
holding meetings and arousing
widespread interest through-
out the district.

The Lawless Players are
coming to town on Friday,
March 15. Dance after show.

BUTTER AND EGGS WANTED
at The Royal Cafe.

Marketing Plan Vetoed.

The scheme to regulate the
marketing of poultry and eggs
in the prairie provinces will
not be put into effect. Minis-
ter of Agriculture Weir an-
nounced in the House of Com-
mons Tuesday, the 12th. It
had been agreed the Act
would not be enforced unless
the Plan carried by at least
two thirds of the voters.

The vote in Alberta stood
62.5 per cent; Saskatchewan,
63.4; Manitoba 24.3 p.c.

Salesmen Wanted.

MAN WANTED for Rawleigh
Route of 800 families. Write
today. Rawleigh, Dept. WGR-96-
SA, Winnipeg, Man., Canada.

Farm For Rent.

North half Sec. 26 and SW. Qr.
24, 52, 1w5; about 500 acres in all;
practically all under cultivation;
would rent on one-third crop terms.
Ph. Litzenger, Stony Plain.

EDWARD BRISKE,
Well Cleaning,
Well Digging.

Next Tony's Chopping Mill.

BRIAR PIPES
JUST RECEIVED
AT THE
ROYAL CAFE,
TO BE SOLD AT
25 CENTS.

NEWSY NOTES FROM SPRUCE GROVE DIST.

The Sherwie garage has
been rented to Mr Kreuger, a
former resident of the Grove
district.

Mr J J Maloney was a visitor
to the City on Monday.

Mr J F Forbes is said to
have rented the big store in
the brick block, and will be open
for business about April 1st. It is
stated that Mr Forbes has also
taken over the agency for Imperial
gasoline and oils, and has procured
a Ford V-8 truck.

It is rumored that Mr Harry
Brox intends joining the ranks of
Alb-rta's young authors—special-
ising possibly on short stories—as
he was up to Stony the other day
and came away with a large-size
writing pad.

Open Seasons for Game.

Deer, moose, Nov. 1 to Dec. 14
Ducks, geese, Sept. 15 to Nov. 14
Elk, Oct. 1—Dec. 14
Grouse, Oct. 1—31
Hungarian Partridge, Sept 15—
Nov 30
Fox, Nov. 1—Jan. 31
Mink, martin, otter, Nov. 1—
March 31
Muskrat, March 1—April 30

RELIEVES COLDS WITHOUT "DOSING"

THE TENDERFOOT

By
GEORGE B. RODNEY

Author of "The Coronado Trail",
"The Canyon Trail", Etc.

CHAPTER XIII.—Continued

When does this here man Kane git here?" asked Peyotl.

"To-morrow night; on the night train from the East. Why?"

"Huh?"—Peyotl was trying to think— "Just for a question, Mist' Sam."

"Suppose that 'ere man doesn't turn up at all . . . What then?"

Dustin eyed him covertly but sharply. The bait was squarely before him and he was nibbling at it. He sat back in his chair and opened a drawer of his desk.

"See there, Peyotl. . . He pointed to an open pasteboard box in the desk drawer. In that box lay an old-fashioned wooden-handled Derringer pistol, double barreled, freshly oiled with no marks of use on it. Beside it lay a green box full of calibre forty-one cartridges; those old-fashioned copper cases green with verdigris as even the Frontier has only occasionally seen in forty years.

"I can't imagine myself in your place, Peyotl," said Dustin. "But I know this: If I knew a man was comin' down here to find a man that I had killed . . . if I knew that a man was comin' down here to hang me . . . well . . . it be his life or mine. That's all. The law justifies a killing in self-defense. If it isn't self-defense to kill a man who's out to kill you, I'll be damned if I know what self-defense is."

It was just such a specious argument as would best appeal to a drug-sodden brain. Dustin stared at Peyotl till he was sure that he had read aright the murderous gleam in the drunken eyes. Then the big ranchman heaved himself up and moved toward the door.

"Of course, I'm not advisin' you to do anything, Peyotl. I can't. I can only tell you what I'd feel like doin'." I'd sure hate to see a stranger come into this country to hang me without my havin' a word to say about it. You stay here and pull yourself together. I'll be back in ten minutes."

"One minute, Mist' Sam. . . . Peyotl clawed at his coat-sleeve. "When's this here man Kane er Kene due to git here?"

"On the night train at Seco to-morrow night. Well, here, I'll be back in a little bit."

Dustin was absent considerably more than ten minutes. The night air drew cold in his nostrils as he stood facing the desert stars. Like a specter of the night a vision of old Dad Kane faced him accusingly. He shivered a little and dubly noted that his hands were wet, yet the night was cool. Little pulses beat in unsuspected places in his mouth that was hot and dry, and from time to time a dull roaring in his ears sounded like thunder. When he finally went back to the office he glanced at the desk. The drawer was open. The Derringer pistol and two cartridges were missing.

Spike Goddard found him huddled in his chair with his shaking head buried in his hands. He was shivering and his face was white and drawn . . . like the face of a very old man . . . and not a good man either.

"What the hell ails you?" demanded Spike. "Seen a ghost?"

"Two," said Dustin with a crackling oath. "One a week old and one that ain't dead yet. . . . I think Peyotl will attend to it, Spike. . . . A long silence fell. . . . "Look here, Spike," he said suddenly. "Let's quit. Let's sell off the Broken Spur and get out of here. We can clean up."

"Sure thing," said Spike. "That red-heifer of Carr's be damned glad to see you go."

For just a second, red murder gleamed in Dustin's eyes. Then he laughed.

"That for that," he said, "six months from now you'll be sleepin' in the bunk-house. My wife and I will need this house."

"Yeah? Well, she won't be no red-headed girl named Edith Carr."

Dustin went on:

"When old Joe Carr learns that the Hour-glass has passed out of his hands he'll be well listenin' to," he said. "Peyotl'll fix everything for us all right."

"I'm sorry you've got that half-wit in on any scheme," said Spike soberly. "If he ain't got sense enough to git himself out of any murder plan, how can you count on him? If you've sent him to work on that scheme . . ."

"I haven't," said Dustin eagerly. "I didn't outline any plan. I just suggested a line of thought to him and he jumped at it."

"Yeah! An' him a qualified sort of fool at that," said Spike. "Well, we'll see what he'll see."

He stamped out into the night and Dustin turned to his decanter.

CHAPTER XIV.

When Stone drove up to the Hour-glass, Crewe was waiting for him and eyed him shrewdly in the dusk. "Come down by the corner," he said. "What did you discover?"

"Very little," he may help some, though. You talk first. Tell me what took place when Dustin came to see Carr to-day."

Crewe laughed grimly.

"It was worth hearin'," he said. "Dustin rode in here about two o'clock and said he wanted to talk with Joe. I told him to go in. You see, I don't like Dustin anyhow and I know Joe don't like him either. Of course, it bein' a private call, I stayed outside, but I heard Dustin tell him that he aimed to marry Edith. He told Carr that he'd always wanted to be friends with him and that if Joe was willin' for him to marry Edith, he'd call off the mutt over Soda Springs and tie up the herds of the two ranches. . . ."

HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and vigor. The healthy active girl is both happy and popular.

Perhaps you are not really ill yet when the day's work is done you are too tired to enter into the good times that other women enjoy. For extra energy, try Lydia E. Pinkham's Vegetable Compound. It tones up your general health. Gives you more pep—more charm.

Remember that 98 out of 100 women report benefits. Les is help you too.

"Well . . . old Joe sat there quite a spell sayin' nothin'. Then he says: 'Well, Mr. Dustin, then it narrows itself down to the fact that you want me for your father-in-law. Is that it?'"

"You damned old fool," he says. "I don't want you for anything. If I take Edith, I got to take you just like a man gets the tail with the hide . . . He got just that far."

"You know what old Joe thinks of Edith . . . what we all think of her. . . . Old Joe lifted himself up to spare his game leg and I could hear every word:

"All right, Mr. Dustin," he said. "You've made yourself pretty clear. So will I. As I get it, you want to marry my daughter and tie up the herds of the Hour-glass and the Broken Spur in one, is that it?"

"That's right," said Dustin. "The two ranches workin' together can make money. Workin' singly they can't. You're losin' money and cattle on the Hour-glass. Ain't that right?"

"I been losin' cattle ever since you and that man Goddard came to the Broken Spur," said Joe. "You'll have a clear sweep, Dustin. But my leg's gettin' a whole lot better lately. I'll all come out in the wash. You see Mr. Dustin, a man named Colt invented a I'll tool that makes even a crippled cattle man the equal of a rustler. Don't you worry about the Springs," he says. "I'll send to that in time. And when it comes to marryin' my daughter . . . well . . . I got a pretty good cook right now in the kitchen. . . ."

"Dustin kept his temper pretty damned good. I'll say that for him. "I don't want a cook," he says. I want a wife."

"Yeah!" says Joe. "Then why not stick to your own kind? Why don't you go down to the place where you keep your other women? My cook tells me there's been an old he-skunk under the barn for five years now. Come to think of it; that's just the same length of time you all've been

at the Broken Spur stealin' Hour-glass cattle. I'm pretty sure that some day when that old skunk gets into the kitchen, that cook's goin' to shoot him. Now, of course, Dustin, I can't say what Edith will say to you. I got my own ideas about it, though. I'm damned sure of one thing. When that old skunk gets into my kitchen, the cook'll shoot him. If any other skunk, four- or two-legged, gets to hangin' his hat on my rack, sure as hell I'll shoot him. I'm sure you get me right, Dustin. . . . That's what he said. . . . Old Frank Crewe fairly crowed in his delight. . . . "Old Joe's in one hell of a mess but he'll charge hell with a dipper or water if he gets hot and he's right mad at Dustin now. What ails you now?" he asked. For Stone's face was a study.

"Well . . . now you listen to me, Crewe. I've got something to tell you that you never guessed. . . ."

Crewe stared at the newest employee of the Hour-glass called the foreman by his last name. Then, without haste, Stone told him all that had taken place that day and Crewe, holding himself to the coral-bars, gave himself up to thought.

"You mean to tell me," he demanded, "that you an' Edith actually found the place that ore came from?"

(To Be Continued)

Attempt Met With Failure

German Inventor's Rocket For Mail Delivery Did Not Work

The rocket mail delivery sponsored by Herr Zucker, the young German inventor, was recently attempted and failed. It was his intention to send a parcel of mails by rocket from the island of Scarpa to the mainland of Harris, half a mile distant. The first experiment failed. The firing apparatus, consisting of a slight wooden runway, with metal hoops to direct the rocket, was set up on the shore at Scarpa, and the rocket, which with its contents weighed 30 pounds, was placed upon it. Herr Zucker connected up the electric fuse, and pressed the button. Instead of the rocket shooting over the Sound of Scarpa, there was a dull explosion, and when the smoke cleared the wreckage of the runway and the rocket was seen on the shore, with the letters strewn about. Another attempt was made, but again there was an explosion, and the letters which have survived were handed to the Post Office for delivery in the ordinary way.

Trusts To Intuition

Women have a more efficient system of thinking than men, O. J. McClure, merchandising counsel, told delegates to the Retail Merchants Association of Canada convention in Toronto. "Women think by intuition," he said. "She feels sure she is right, but can't tell why. Men reasons but often finds that woman by her simple system is more often right in her conclusions."

Gaitas, Spanish bagpipes, dating back to the ninth century, and other historic musical instruments from Spain are soon to be heard in broadcast.

An ounce of keeping your mouth shut is worth a pound of trying to square yourself.

Now Science Explains Why So Many People Past 40

Feel That They're Slipping
Losing Their "Grip" on Things

Many people "round 40 think they're 'growing old.' They feel tired a lot . . . 'weak.' Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all!

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores over the country. Each tablet is the equivalent of one teaspoonful of the liquid form. Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia

Vicar: "I was grieved to hear your husband has gone at last."

Mrs. Black: "Yes, 'e 'as, sir, and only hope 'e's gone where I know 'e ain't."

Tested Eczema Remedy

In Prescription of Doctor

Your skin trouble—whether it is eczema, acne, hives, dandruff, ringworm infection or pimples and blotches—will be positively benefited by D.D.D., because D.D.D. is a tried and tested Physician's Prescription. D.D.D. was developed originally for his own patients by Dr. D. D. Dennis. It is now manufactured by the makers of Camphor's Italian Balm. In 25 years D.D.D. has brought clear, beautiful skin to millions. At drug stores. Trial size free. Guaranteed to give instant relief or money refunded.

"Dear, I'm sorry you're going to marry that scapegrace of a Sam Jones."

"He said you would be. He told me you ran after him for a year."

Rheumatism

Is caused by failure of kidneys to remove acid poisons from the blood. GIN PILLS relieves by neutralizing this acid and restoring the kidneys to normal action—free a box at all druggists.

YOUNG LADY BREAKS LEG AT SKATING RINK

While two young ladies, Miss Valorie Davidson and Miss Charlotte Smith, were skating together around the local rink on Saturday night Miss Davidson tripped and fell to the ice. Miss Smith fell also, on top of Miss Davidson. The latter had the misfortune to have her left leg about 6 inches from the ankle broken. She was helped to the waiting room, and Dr Oatway summoned, who had her conveyed to his residence. Later, she was removed to the Davidson home at Holborn.

Miss Davidson is one of the advanced students at S. P. High.

MRS. W. W. ROGERS ON "SOCIAL CREDIT"

The well-filled hall at Monday night's Social Credit meeting testified to the strong hold which that question has taken on the Stony Plain community.

Dr Hall of Edmonton was in the chair, and Mrs W W Rogers of Calgary was the speaker of the evening. She proved to be the best exponent of the New Cause who has so far addressed a Stony audience, as her handling of this question showed she had given it deep thought and considerable study.

During the course of her remarks she reminded her hearers that Major Douglas, the inventor of the System which bears his name, last year addressed a committee of the Alberta Legislature and also the members of the House. A printed account of those proceedings may be obtained by applying to the King's Printer, Edmonton.

Another volume Mrs Rogers advised them to peruse was the Canada Year Book, procurable from the King's Printer, Ottawa.

It would be next to impossible to give a detailed account of Mrs Rogers' address, so choicely it was of illuminating facts and new ideas, but one statement was noted. When the payment of bonuses (in coin or other tokens) began, high school boys 16 years of age would be the first beneficiaries, those receiving \$5 a month, the amount increasing as the bonus party grew, until at the age of 21 he'd be getting \$25 a month, the minimum for adults.

Under the New System saving, hoarding and nickel pinching would be taboo, and Compulsory Spending would be the order of the day.

STONY PLAIN BUSINESS PEOPLE RE-ORGANIZE THE BOARD OF TRADE

At a Very Enthusiastic Meeting Committees Are Appointed to Deal with Various Matters.

About two score local merchants, professional men and prominent citizens met in the town hall the other evening for the purpose of having a heart-to-heart discussion on civic problems, etc.

The assembly was called to order by A E Michael, who stated one of the objects in having the meeting called was for the purpose of making an effort to reintroduce here the old hog marketing day, which met with much favor at the time, and also meant considerable business for the local merchants.

Mr T J Hardwick was elected as president of the organization, with Mr J Malloch as secretary.

A motion was then made that the organization be called the Chamber of Commerce. An amendment to this was moved, and carried, that the name be "The Stony Plain and District Board of Trade."

The first matter taken up had reference to the marketing of hogs, and a suggestion was made that efforts be made to have a return to the old system which formerly prevailed here.

In those days when Meredith Bros., R E Wood, C E Rice, and others, were operating here every Thursday, as many as three carloads of hogs would go thru the local dealers' hands on that day. This system of marketing has been entirely supplanted by the newer method, whereby a truckman drives up to the farmer's pen, loads his hogs, and the next stop is in Edmonton, at a packing plant.

In the majority of these transactions the hog never sees Stony, and the Stony merchant never sees the hog-grower's pen. Several suggestions were made whereby the old system could be reinstated.

When asked for his opinion on the question, Mr H B Bjork gave a very comprehensive review of hog marketing and its various ramifications.

A committee of three was appointed to secure information on the procedure employed at such hog-buying points as Camrose, Thorby and other places, where it is said the hogs are bought by a local man at each of these places, and shipped direct to the Coast.

The egg-and-butter problem was next discussed, and some anxiety was expressed as to Stony Plain's position if the provisions of the suggested federal Marketing Act be enforced.

A very good exposition of the grading and handling of poultry products was given by Mr C Loy.

Attention was drawn to the unsatisfactory mail service we are at present getting. A suggestion was made, the Hon Hsa Stewart be written to about this, and also the P.M.G. at Ottawa.

An Executive Committee of five members from the town and five from the country, from such districts as Blueberry, Holborn, Golden Spike, Brightlink and Hansen Corners, was then arranged.

Mr Geo Bryan explained a clause in the Edmonton City charter that practically prohibits a merchant from bringing home in his car any goods purchased in the City.

The membership fee was fixed at \$1, and all present joined up.

Three Major Canadian Problems

Tariff, agriculture and railway situation discussed by E. W. Beatty, K.C., LL.D., Chairman and President, Canadian Pacific Railway—Urges unified effort to solve questions threatening integrity of State.

A tariff structure based solely upon the actual economic needs of the country, a deeper appreciation of a wider and more active application of sympathetically intelligent thought to agricultural problems; and the unification of Canadian railroads for the purpose of operation as the only means of overcoming the present disastrous debt structure created through public ownership, were the three major themes emphasized by E. W. Beatty, K.C., LL.D., Chairman and President, Canadian Pacific Railway, during the course of a forceful outline of these economic problems before the Regina Board of Trade on February 5th.

Beatty, in his address, pointed out that the problems before the Regina Board of Trade on February 5th, during the course of a forceful outline of these economic problems before the Regina Board of Trade on February 5th.

E. W. BEATTY, K.C., LL.D., Chairman and President, Canadian Pacific Ry.

"service of individuals, individual groups, and sections of the country to the whole State in the only safe road for the future," Mr. Beatty appealed to the country at large to make this theme a dominating note in approaching the problems of the day.

Again voicing his theme of belief in the ultimate destiny of Canada, Mr. Beatty emphasized the necessity of a mutual understanding between all sections of the country, and insisted that should this objective be achieved, the unified effort of all citizens would go far toward solving problems which now threaten the integrity of the State.

In the light of this argument Mr. Beatty felt that he had every right to discuss the tariff, citing the fact that the Canadian Pacific Railway was most decidedly susceptible to the effects of unstable tariff conditions. "Give me a tariff policy," he said, "and I shall be quite content," he said.

Mr. Beatty was neither a believer in free trade nor a protectionist. He believed in the maximum of national wealth fairly distributed among the citizens. The Canadian tariff should be a mutual understanding between all sections of the country, and insisted that should this objective be achieved, the unified effort of all citizens would go far toward solving problems which now threaten the integrity of the State.

Mr. Beatty illustrated his argument by citing the fact that Canada enjoyed a greater foreign commerce per capita than either of the two more important Anglo-Republics, namely, the United States and the Argentine, and said that he would like to see the preparation of a tariff balance sheet which would give an analysis of the effect of the tariff on the total national purchasing power of the Canadian people, and urged that in view of the present position of agriculture and labor, an examination of the economic soundness of our tariff policy should look to future improvement rather than to drastic attempts to correct past errors.

Emphasizing that agriculture was the primary industry, and voicing his appreciation that agriculture in Western Canada was passing through a period of great difficulty, Mr. Beatty said that Governmental assistance and that of private business institutions had on the whole, been constructive.

"I may say," he added, "without boasting, that the emergency reductions in freight rates voluntarily made by the Canadian Pacific Railway for farm relief during the past five years represent a loss in income to us of at least \$3,000,000."

There were two necessary measures looking toward permanent recovery. First there was what the farmer could do, and second, what the Government was doing for himself, to make the farm home largely self-sufficient through the use of better seed, improved methods, and the expansion of live-stock operations.

Secondly there was what others could do to help Western agriculture. The capital invested in the farms of Canada must receive returns if any important block of capital was to be regarded as safe.

Other labor could not do so, for the permanence of a level of wages too high above the earnings of labor on the land. Mr. Beatty expressed unflinching confidence that private business would find a road, now being eagerly sought, whereby it could render material assistance to agriculture.

Pointing out that the Canadian people pay for the railway services which they receive, and the costs of Government, Mr. Beatty emphasized that the railway problem was in reality the problem of every individual citizen. The cost to the public in freight charges of moving a ton a mile in Canada was as low as in any major country in the world. Unhappily the full advantage of these low rates was not retained because taxes paid or to be paid, to meet the annual deficits of the Canadian National Railways must be added to the actual freight charges. The cost of transportation in Canada was not as cheap as it seemed to be, or as it should be.

Two current suggestions for improvement in operating efficiency were, first, the adoption of modernistic equipment, and secondly, a drastic reduction in wages. Mr. Beatty pointed out that the huge investment in existing equipment, and the difficulty of finding capital to finance new equipment, indicated that progress along the lines of the first suggestion would be slow.

Mr. Beatty urged strongly against reduced wages, and pointed out that the railway employees spent wages as well as earned them. He felt that railway as a service industry, and one with the returns to the farmers for their labor, but emphasizing the belief that the remedy lay in an increase in the farmers' earnings rather than a lowering of the standard of living among railway workers.

Another suggested solution was the proposal to increase freight rates. The freight rate trend was downward, and Mr. Beatty would greatly regret to see an increase in rates until everything possible was done to eliminate waste.

The argument that there was no waste in transportation and all that the country needed to do was to wait the return of prosperity was not, Mr. Beatty considered, sound. Restoration of business to the level of 1917-1920 would not come as a gift of Heaven, or overnight, but only as a result of national industry and thrift.

Mr. Beatty replied to arguments that under his unification proposal the Canadian Pacific would take over the assets of the Canadian National, and the liabilities would be left to the Government.

"Unified management will do nothing of the kind. The physical assets of the Canadian National will remain the property of its owners. Similarly the liabilities of the Canadian National must remain the responsibility of the Government and the liabilities of the Canadian Pacific must remain that of its owners. However, if the assets of both companies are administered by a unified management and will be put to the waste of competition and the owners of the Canadian National will receive more money with which to meet their obligations."

The fact that only 2% of the excessive debt of the Canadian National Railways was due to the errors of private capitalists, or any arguments dealing with errors either private or Governmental would not help the situation of today. Interest charges on the Canadian National debt which in 1919 were \$35,000,000, last year were \$95,000,000. No man capable of facing facts could carry the burden indefinitely.

"We, the people of Canada, owe directly or indirectly to private capitalists over \$2,700,000,000 on account of the Canadian National Railway system. We are going to pay this because we promised to."

"Are you going to allow your judgment to be warped by complex arguments about doing justice to public ownership? Or are you going to agree with me to leave the ownership of the Canadian National Railways in the hands of the public—since they could not possibly get rid of it—and devote our entire energy to finding a method of making the burden of this ownership as light as possible to the people of Canada."

"Taking it that as business men you will not wish to gamble with a burden of railway deficits which already threatens the financial stability of the nation when a reasonable alternative is available, I have suggested what seems to me to be the only adequate course—the unified management of the two major railway systems. The amount which can be saved annually—now, not in

some bright day to come—was calculated by officers of the Canadian Pacific and Mr. Fairweather of the Canadian National Railways. Mr. Fairweather's estimate was based on the traffic conditions of 1930, an average traffic year, and on that basis I put the figure at \$75,000,000. Sir Henry Thornton, who opposed my plan, gave his estimate as \$60,000,000 and Mr. Fairweather suggested \$60,000,000 for a year of normal traffic. In justice to Mr. Fairweather I must state that he has since said that he told the Commission that his estimate could not be realized. I believed then and believe now that mine can be."

Mr. Beatty's proposal had met with much criticism, that no one group of men could properly administer the unified railways; that he was talking of setting up a great monopoly; that mine must be broken up; that he proposed to throw thousands of men out of work. Mr. Beatty dispelled these criticisms by pointing to the efficiency and loyalty of the employees of both railways, and by pointing out that he proposed to throw thousands of men out of work. Mr. Beatty dispelled these criticisms by pointing to the efficiency and loyalty of the employees of both railways, and by pointing out that he proposed to throw thousands of men out of work.

He said: "It is indeed my hope and belief that the methods which I suggest will operate to prevent an even more disastrous period of low wages and unemployment than that through which we have passed. Surely the labor leaders of this country are the intelligent men that I have always found them to be, and will tell their constituents that waste of the country's growth on useless services can damage no one more certainly and more severely than those who depend on their labor for their living. I venture the prophecy that, as events develop and the increased thought being given to the subject produces its effect, railway employees generally, and particularly the recognized representatives of organized labor which forms such a considerable part of railway staffs, will not only recognize the inevitability of it, but will come to urge rather than to oppose some such measure as I have suggested as in their own best interest."

Stressing that the report of the recent Royal Commission stated that some of the Commissioners would have said that the Canadian Pacific was not a bankrupt undertaking, but on the other hand a thoroughly solvent one, Mr. Beatty went on to say:

"What I have suggested, and suggest today, is that we should plan to divide the net earnings of the unified properties to give to each group of owners the net earnings which would have resulted if each had operated their own railway, together with a fair share of the savings resulting from unification. There is much misunderstanding in this regard. Many have confused the total net earnings after unification with the savings from unification. The earning power of the two separate systems is a matter of record. The increased earning power of the combined properties arising from unification is another matter, and that will not plates the division of such increased earnings on a fair basis. This is a matter which will be settled by negotiations between the interested parties but obviously the Canadian Pacific would have to concede to the Government at least one-half of the national debt of the country would be hundreds of millions of dollars less than it is now. Your own children will pay it. Are you in favor of piling it up?"

In conclusion, Mr. Beatty again pointed out that if such a plan had been adopted 20 years ago, or even 15 years ago, the national debt of the country would be hundreds of millions of dollars less than it is now. Your own children will pay it. Are you in favor of piling it up?"
